

Intersecting Lists or Comparison Charts

Intersecting lists, or comparison charts, organize information into categories. For example, the italicized words in each illustration below are samples of the

information you can include in the charts that will make your learning easier and improve your ability to anticipate test questions. This is an efficient way to see the relationship between ideas. Filling out a comparison chart draws your attention to that relationship(s).

Category 1 <i>Term</i>	Category 2 <i>Definition</i>	Category 3 <i>Significance</i>	Category 4 <i>Example</i>
A			
B			
C			
D			

Category A <i>Causes</i>	Category B <i>Effects</i>
