

## Test Analysis

**Directions:** Analyze the test after it has been graded. This test analysis will give you confirmation of the major source of information and where your errors occurred. These factors help you anticipate test questions for the future by identifying the sources you may need to devote more study time to as well as practice the type of questions that will probably appear on the next test.

Categories for Analysis	Factors to Analyze in Each Category	Number	Percent
Determine the source of information for each question.	Text Class notes Lab/Studio Other	_____ _____ _____	_____ _____ _____
Determine where you lost points.	Text Class notes Lab/Studio Other	_____ _____ _____	_____ _____ _____
Determine the organizational patterns of information in the missed questions.	Definition Order/Sequence Listing Compare/Contrast Cause/Effect	_____ _____ _____ _____ _____	_____ _____ _____ _____ _____
Determine the level of comprehension in the missed questions.	Recognize Understand Examples Apply Analyze	_____ _____ _____ _____ _____	_____ _____ _____ _____ _____

Once you have analyzed the test, use the information to ask yourself the following questions:

1. Can you detect the pattern of your errors?
2. List some ways that you need to change your test preparation.
3. Create a process diagram illustrating your step-by-step plan for preparing for the next test. Post it in your room so it is a visual reminder and organizer.
